

Agricultural and Fish Products Inspectors

Agricultural and Fish Products Inspectors are responsible for ensuring that food products such as crops, livestock, and fish meet quality, safety, and legal standards. They examine products, facilities, and processes to protect public health and ensure compliance with government regulations. Their work helps maintain food safety and supports fair trade practices.

Duties and Responsibilities (Points):

- Inspect agricultural and fish products for quality and safety
- Check farms, processing plants, and storage facilities
- Ensure compliance with health, safety, and legal regulations
- Examine products for contamination, damage, or disease
- Collect samples for laboratory testing and analysis
- Monitor handling, packaging, and transportation processes
- Report inspection findings and maintain records
- Enforce standards and recommend corrective actions
- Work with farmers, producers, and suppliers
- Prevent distribution of unsafe or substandard products
