

## **Engineering Managers**

Engineering Managers plan, direct, and coordinate engineering projects and teams within organizations. They combine technical expertise with leadership skills to ensure projects are completed on time, within budget, and meet quality and safety standards. Their role bridges engineering innovation with organizational strategy.

### **Duties and Responsibilities (Points):**

- Plan, manage, and oversee engineering projects from conception to completion
- Lead and supervise engineering teams and technical staff
- Allocate resources, manage budgets, and schedule project timelines
- Ensure compliance with safety, quality, and regulatory standards
- Review and approve technical designs, plans, and reports
- Collaborate with other departments, clients, and stakeholders
- Identify and resolve technical or operational challenges
- Implement process improvements and innovative engineering solutions
- Monitor project progress and performance metrics
- Mentor staff and provide professional development opportunities
